Google Drive is a complete service that allows you to store your files online and access you from all your devices. But how does he stack against his competitors? You can add files by dragging and releasing, or passing through the simple menu options. Its features are not in-depth, but its perfect integration with Apple devices makes it excellent choice for Mac and iPhone users. To learn more, visit our review [Apple iCloud](#). Google Drive: Final judgment Interfaces Google Drive fluids and efficient simplify loading and editing files and file synchronization between devices. You can easily create and open files from the Drive interface. In addition to being a search engine and e-mail providers, Google offers one of the best cloud storage solutions available. These cost \$ 6 per user a month for 30GB of storage space each, \$ 12 per user a month for 2TB each, or \$ 18 per user per month for 5TB each. google Docs is well integrated into Drive (Image credit: Google) Google Drive It has a number of file sharing options, all very simple to use. This also includes the text on the inside of PDFs and images, using optical character recognition (OCR) .Google Drive: interface and in use easy to navigate in the Google Drive folder structure (Image Credit: Google) there are three ways To access the Google Drive files via a web browser, a mobile app or a desktop tool called Backup and Sync, which allows you to integrate the drive folder structure to Windows File Explorer or Finder on a Mac. Lã €™ browser interface Web is very well designed, with a clear and easily navigable folder structure and distinctive icons that allow you to find the necessary tools without too many problems. Like Google Drive, this a very slick service, with useful browser and mobile interfaces and desktop integration. This is widespread in all Google applications, not only Google Drive, but also Gmail and Google Photos. Photos, sign up for a personal Google One plan. However, this should not be a serious problem for most users. This offers 5GB on its free plan, and paid plans start at a minimum of \$0.99 for 50GB, going up to \$9.99 a month for 2TB. It means you can save a file directly to a Google Drive folder on your desktop, and access it almost instantly on your mobile device. Google Drive: Support Google has a full Help Center (Image credit: Google) This is a full Help Center available on Google's website, which provides answers to most of the technical issues you might encounter with Google Drive. It's easy to organize, copy and create your favorite files, and access tools such as sharing controls. The mobile app has a similar but scaled-down design, making it easy to switch from one device to another and keep track of your documents. After a short setup process, syncing between devices is automatic and fast. It also has a wide range of useful features, such as file sharing, version control and advanced search. We would like to see Google strengthen its security and add full end-to-end encryption. This means that Google's technicians can decrypt files if forced to do so by law enforcement, and that leaves the system potentially vulnerable to hackers. Alternatives to Google Drive The most popular competitor is Dropbox. You can search by file name, file type, keywords and words contained in a file. The service is generally efficient, taking about ten minutes to be connected with an agent. Google Drive: Security Google claims to have industry-leading security (Image credit: Google) Google offers several options to keep your documents safe, including various two-factor authentication.
